sunnyscopa

Unmatched quality and innovation,
for a decal paper that exceeds expectations.

sunnyscopa
MADE IN SOUTH KOREA SINCE 1990

Unmatched quality and innovation,
for a decal paper that exceeds expectations.

Clear / White

Our clear version is perfect for light surfaces, offering a transparent background that seamlessly blends with the base material, while our white version ensures optimal visibility when applied to dark surfaces.

It's important to note that printers are designed to print onto white surfaces, hence the need for a white decal paper to ensure your designs stand out vividly, even on darker backgrounds. You can use a White Toner Printer if you want to print white, or be creative and layer a clear decal paper on white decal paper.

Clear Backing Material is clear image during application.

Semi-Gloss Printing Layer Holds and protects the reversed image.

Super Adhesive Creates a strong bond.

NO COATING REQUIRED. The image is secured between two membranes, creating an ultra-thin Rub-On Transfer.

You can use a White Toner Printer if you want to print white, or be creative and layer a clear decal paper on white decal paper.

Clear Backing Maintains decal shape during application.

Semi-Gloss Printing Layer Holds and protects the reversed image.

Super Adhesive Creates a strong bond.

NO COATING REQUIRED. The image is secured between two membranes, creating an ultra-thin Rub-On Transfer.

Water Resistant

Like our other Tattoo Paper products, the tattoo is supported with a very strong skin-safe adhesion.

The bond gets stronger as the tattoo dries and adapts to your skin. The tattoo can be removed in the shower using Natural Oils or Baby Oil.

For maximum longevity, it is recommended the skin is clean and oil free, as well as fully shaved (even fine or "invisible" hairs) before applying the tattoo. If water resistance is a requirement, we recommend using a Laser Printer. Laser Printer toner is naturally water resistant, whereas Inkjet is water soluble.
